

CATAMARAN ARCHIPELL II

Offers space and comfort combined with stability making it perfect for an adventure in the Galapagos Islands.

ITINERARY A THURSDAY TO MONDAY 5 DAYS - 4 NIGHTS

DAY	VISIT
THU	AM - Arrival at Seymour Ecological Airport PM - Highlands (Santa Cruz)
FRI	AM - Tintoreras Islet PM - Arnaldo Tupiza Tortoise Breeding Center
SAT	AM - Moreno Point (Isabela) PM - Elizabeth Bay (Isabela)
SUN	AM - Tagus Cove (Isabela) PM - Espinoza Point (Fernandina)
MON	AM - Bachas Beach (Santa Cruz) PM - Transfer out to Seymour Ecological Airport

All Galapagos itineraries are subject to change without prior notice due to National Park regulations, weather conditions, and majeure.

CATAMARAN ARCHIPEL II

ITINERARY A / THURSDAY TO MONDAY

5D / 4N - DAY BY DAY PROGRAM

DAY 1 - THURSDAY

AM - ARRIVAL AT SEYMOUR ECOLOGICAL AIRPORT (GPS)

Upon arrival at the Seymour Ecological Airport, travelers pass through an airport inspection point to make sure that no foreign plants or animals are introduced to the islands, and to pay the park entrance fee of \$100 (unless it has been prepaid). A guide will meet you, help you collect your luggage, and escort you on a short bus ride to the harbor.

PM - HIGHLANDS (SANTA CRUZ)

The road to the highlands leaves from Bellavista, a small village located at a 15-minute drive from Puerto Ayora and passes through the agricultural zone, near the National Park boundary, the Miconia Zone, and then goes to the Fern and Sedge zone. With clear weather, this area gives you beautiful scenes of rolling hills and extinct volcanic cones covered with grass and lush greenery all year round. Here you will visit the Twin Craters, which are two pit craters, as well as a local ranch where we can observe the Giant Tortoise specie of Santa Cruz Island in its natural habitat.

DAY 2 - FRIDAY

AM - TINTORERAS ISLET

"Tintoreras" are small islands in front of the Puerto Villamil coast. There are Herons on the lookout on mangrove branches, Galapagos Penguins and sea lions that often pop out on shore. White-tipped reef sharks (in Spanish: Tintoreras) are common in the archipelago and are very commonly found resting in the shallow waters.

PM - ARNALDO TUPIZA BREEDING CENTER

In the Arnaldo Tupiza Tortoise Breeding Centre you can see hundreds of giant Galapagos tortoises of all sizes. Vulnerable hatchlings are not gigantic at all, even smaller than the size of your hand! This project just outside Puerto Villamil was created to rescue the endangered populations of Isabela's both southernmost volcanoes. From the almost incredible estimations of 250,000 giant tortoises in the 16th century, by the 1970s there were only about 3,000 individuals remaining. One thing becomes clear on your visit: it's hard work to save these creatures from extinction by reproduction in captivity and repopulation. The good news is that these programmes are successful and have already saved several species from extinction so far. By 2015 their number increased to about 32,000 in all the archipelago. Don't forget to visit the native botanical garden of this breeding centre. It also attracts colourful songbirds such as yellow warblers, Darwin's finches, Galapagos and vermilion flycatchers. Finally there is no greater counterpart to the cumbersome tortoises than the graceful American flamingos which frequently filter the saline waters of the adjacent lagoon for shrimp and algae. They are joined by a handful of species of aquatic and shore birds, from which some even migrate from Canada and Alaska.

DAY 3 - SATURDAY

AM - MORENO POINT (ISABELA)

Moreno Point is located on the north coast of Isabela Island between the volcanos Sierra Negra and Cerro Azul. The trail runs along a solidified lava flow called "Pahohoe", into a complex of coastal lagoons. Its main attraction are several species of birds, which are found around the lakes and mangroves.

PM - ELIZABETH BAY (ISABELA)

This is a marine visitor site, so the excursion has no landing point. Your zodiac ride starts with a visit to the Marietas islets where the largest and most important penguin colony reside in the Galapagos Islands. The excursion continues into the cove that is surrounded by red mangroves where you can admire their red roots and green leaves. Here, you are able to observe sea turtles, flightless cormorants, spotted eagle rays, golden rays, brown pelicans and sea lions. Frequent visitors have been able to see Galapagos Hawks soaring overhead whilst schools of Pompano and Dorado fish swimming down below.

DAY 4 - SUNDAY

AM - TAGUS COVE (ISABELA)

Tagus Cove, a tour along the cliffs will give the visitors a good chance to see the Galapagos penguin, the flightless cormorant and other sea birds. From the landing dock, it is about a 30-minute hike along the trail up to the top of the cliff from where you can view Darwin Lake, an uplifted lake saltier than the sea. You can also see several volcanoes from this location. Look carefully at the graffiti on the surrounding cliffs of the cove, it has been written by pirates, whalers and buccaneers in past centuries!

PM - ESPINOZA POINT (FERNANDINA)

Fernandina is the third largest island in the archipelago and has a single visitor site: Punta Espinoza located at the northeastern tip of the island. Here, marine iguanas conglomerate in larger groups than in any other island. They bask around in the sand, swim near the shore and sometimes, block the way at the landing dock. Among the unique species found here, we can find the Flightless Cormorant.

DAY 5 - MONDAY

AM - BACHAS BEACH (SANTA CRUZ)

These two small beaches are found to the West of Turtle Cove. Their sand is made of decomposed coral, which makes it white and soft, and a favorite nesting site for sea turtles. Behind one of the beaches there is a small blackish water lagoon, where it is occasionally possible to observe flamingos and other coastal birds, such as black-necked stilts and whimbrels. The other beach is longer, but it has two old barges that were abandoned during the World War II, when USA used Baltra Island as a strategic point to protect the Panama Channel.

PM - TRANSFER OUT TO SEYMOUR ECOLOGICAL AIRPORT (GPS)

Assisted by the naturalist guide and some crewmembers, the dinghy will bring you and your luggage to the Seymour Ecological Airport, where we will take the shuttle back to the airport.
