

CATAMARAN ARCHIPELL II

Offers space and comfort combined with stability making it perfect for an adventure in the Galapagos Islands.

ITINERARY A MONDAY TO MONDAY 8 DAYS - 7 NIGHTS

DAY	VISIT
MON	AM - Arrival at San Cristobal Airport (SCY) PM - Lobos Islet
TUE	AM - South Plaza PM - Santa Fe
WED	AM - Chinese Hat PM - Dragon Hill (Santa Cruz)
THU	PM - Charles Darwin Research Station PM - Highlands (Santa Cruz)
FRI	AM - Tintoreras Islet PM - Arnoldo Tupiza Breeding Center
SAT	AM - Moreno Point (Isabela) PM - Elizabeth Bay (Isabela)
SUN	AM - Tagus Cove (Isabela) PM - Espinoza Point (Fernandina)
MON	AM - Bachas Beach (Santa Cruz) PM - Transfer out to Seymour Ecological Airport (GPS)

All Galapagos itineraries are subject to change without prior notice due to National Park regulations, weather conditions, and majeure.

CATAMARAN ARCHIPEL II

ITINERARY A - MONDAY TO MONDAY

8D - 7N DAY BY DAY PROGRAM

DAY 1 - MONDAY

AM - ARRIVAL AT SAN CRISTOBAL AIRPORT (SCY)

Upon arrival at the San Cristóbal Airport, travellers pass through an airport inspection point to make sure that no foreign plants or animals are introduced to the islands, and to pay the park entrance fee of \$100 (unless it has been prepaid). A guide will meet you, help you collect your luggage, and escort you on a short bus ride to the harbour.

PM - LOBOS ISLET

You will start with your first excursion to Lobos Islet, the beach harbors a colony of Galapagos sea lions. You can also see two other emblematic species breed here: male blue-footed boobies and great frigate birds who try to impress the females (and tourists) with clumsy dances, heaving their striking blue feet or blowing up their balloon-sized scarlet pouches. During the breeding season, the fluffy and hungry chicks cry for food, and when their wings get strong enough, they will learn to fly.

DAY 2 - TUESDAY

AM - SOUTH PLAZA

South Plaza is located at the east of Santa Cruz Island, and forms part of two islands known as Islas Plazas. Despite its small size, some of the most interesting and outstanding species of the Galapagos are found here. The Plazas land iguanas are smaller than its relatives found on other islands. There are several hybrid iguanas, a result of crossing a male marine iguana and a female land iguana; they are unique, recognizable at first glance by their black/gray color, with a land iguana's crest, but face and tail of the marine iguana. The big population of iguanas is due to the presence of tunas, their favorite food. Swallow Tailed Gulls nesting in the rugged cliffs are seen along with other sea birds such as Audubon shearwaters, red-billed tropicbirds, frigate birds and brown pelicans.

PM - SANTA FE

Located in the southeastern part of the Galapagos, this island was formed from an uplift instead than from a volcanic origin; this is why it is mostly flat. There are some theories that assure that this could be the oldest island in the Archipelago. Santa Fe is the home of a number of endemic species like the Galapagos Hawk, Galapagos snake, Galapagos mockingbird, rice rats and one of the two species of land Iguanas of the islands. After disembarkation in the beautiful and clear waters, you will be in contact with one of the many sea lion colonies. Along the trail, many saltbushes can be seen, as well giant Prickly pear cactus. There are great possibilities of snorkeling with playful sea lions and tropical fishes

DAY 3 - WEDNESDAY

AM - CHINESE HAT

Chinese Hat is a 52m/170ft high volcanic cone, forming another islet right out of the rocky coast of Santiago, where a small colony of Galapagos penguins have settled. Approaching Chinese Hat from the north, you will understand the meaning of the name. This is an excellent place to learn more about volcanoes, lava bombs and lava tunnels.

You will arrive exactly on time to witness how this barren islet is colonized by pioneer species that have begun to sprout! Beautiful beaches of white coral sand and holes in the eroding lava fields are filled up with lava sand, which enables rooting. Galapagos sea lions and countless marine iguanas contribute to fertilization, and altogether, create many favorable options for newcomers, such as saltbush and the sesuvium carpet.

PM - DRAGON HILL (SANTA CRUZ)

The visitor site at Dragon Hill has been open for visits since 1993. This site is located in northwestern Santa Cruz Island and consists of a trail that leads to a hyper-saline lagoon behind the beach, frequently visited by flamingos, pintail ducks and other species of birds. This site has been re-populated with land iguanas from Seymour, Isabela and Santa Cruz island. There is a short walk to the Hill, which offers a beautiful view of the bay.

DAY 4 - THURSDAY

AM - CHARLES DARWIN RESEARCH STATION

Although the great majority of Galapagos visitors come here to observe and appreciate natural wonders, it is also interesting to learn how the protection and conservation of the islands are done. The main attractions are the National Park information center, the Van Staelen Exhibition Hall, the Breeding and Rearing Center for young tortoises, and adult Galapagos tortoises in captivity.

PM - HIGHLANDS (SANTA CRUZ)

The road to the highlands leaves from Bellavista, a small village located at a 15-minute drive from Puerto Ayo-ra and passes through the agricultural zone, near the National Park boundary, the Miconia Zone, and then goes to the Fern and Sedge zone. With clear weather, this area gives you beautiful scenes of rolling hills and extinct volcanic cones covered with grass and lush greenery all year round. Here you will visit the Twin Craters, which are two pit craters, as well as a local ranch where we can observe the Giant Tortoise specie of Santa Cruz Island in its natural habitat.

DAY 5 - FRIDAY

AM - TINTORERAS ISLET

"Tintoreras" are small islands in front of the Puerto Villamil coast. There are Herons on the lookout on mangrove branches, Galapagos Penguins and sea lions that often pop out on shore. White-tipped reef sharks (in Spanish: Tintoreras) are common in the archipelago and are very commonly found resting in the shallow waters.

PM - ARNOLDO TUPIZA BREEDING CENTER

In the Arnaldo Tupiza Tortoise Breeding Centre you can see hundreds of giant Galapagos tortoises of all sizes. Vulnerable hatchlings are not gigantic at all, even smaller than the size of your hand! This project just outside Puerto Villamil was created to rescue the endangered populations of Isabela's both southernmost volcanoes. From the almost incredible estimations of 250,000 giant tortoises in the 16th century, by the 1970s there were only about 3,000 individuals remaining. One thing becomes clear on your visit: it's hard work to save these creatures from extinction by reproduction in captivity and repopulation. The good news is that these programmes are successful and have already saved several species from extinction so far. By 2015 their number increased to about 32,000 in all the archipelago. Don't forget to visit the native botanical garden of this breeding centre. It also attracts colourful songbirds such as yellow warblers, Darwin's finches, Galapagos and vermillion flycatchers. Finally there is no greater counterpart to the cumbersome tortoises than the graceful American flamingos which frequently filter the saline waters of the adjacent lagoon for shrimp and algae. They are joined by a handful of species of aquatic and shore birds.

DAY 6 - SATURDAY

AM - MORENO POINT (ISABELA)

Moreno Point is located on the north coast of Isabela Island between the volcanos Sierra Negra and Cerro Azul. The trail runs along a solidified lava flow called "Pahohoe", into a complex of coastal lagoons. Its main attraction are several species of birds, which are found around the lakes and mangroves.

PM - ELIZABETH BAY (ISABELA)

This is a marine visitor site, so the excursion has no landing point. Your zodiac ride starts with a visit to the Marie-las islets where the largest and most important penguin colony reside in the Galapagos Islands. The excursion continues into the cove that is surrounded by red mangroves where you can admire their red roots and green leafs. Here, you are able to observe sea turtles, flightless cormorants, spotted eagle rays, golden rays, brown pelicans and sea lions. Frequent visitors have been able to see Galapagos Hawks soaring overhead whilst schools of Pompano and Dorado fish swimming down below.

DAY 7 - SUNDAY

AM - TAGUS COVE (ISABELA)

Tagus Cove, a tour along the cliffs will give the visitors a good chance to see the Galapagos penguin, the flightless cormorant and other sea birds. From the landing dock, it is about a 30-minute hike along the trail up to the top of the cliff from where you can view Darwin Lake, an uplifted lake saltier than the sea. You can also see several volcanoes from this location. Look carefully at the graffiti on the surrounding cliffs of the cove, it has been written by pirates, whalers and buccaneers in past centuries!

PM - ESPINOZA POINT (FERNANDINA)

Fernandina is the third largest island in the archipelago and has a single visitor site: Punta Espinoza located at the northeastern tip of the island. Here, marine iguanas conglomerate in larger groups than in any other island. They bask around in the sand, swim near the shore and sometimes, block the way at the landing dock. Among the unique species found here, we can find the Flightless Cormorant.

DAY 8 - MONDAY

AM - BACHAS BEACH (SANTA CRUZ)

These two small beaches are found to the West of Turtle Cove. Their sand is made of decomposed coral, which makes it white and soft, and a favorite nesting site for sea turtles. Behind one of the beaches there is a small blackish water lagoon, where it is occasionally possible to observe flamingos and other coastal birds, such as black-necked stilts and whimbrels. The other beach is longer, but it has two old barges that were abandoned during the World War II, when USA used Baltra Island as a strategic point to protect the Panama.

PM - TRANSFER OUT TO SEYMOUR ECOLOGICAL AIRPORT (GPS)

Assisted by the naturalist guide and some crewmembers, the dinghy will bring you and your luggage to the Seymour Ecological Airport, where we will take the shuttle back to the airport.
